## “SPECIAL PACKAGE PROGRAM” Accommodation meals and visits

To discover Barcelona in an unusual way in completion of the  
“6 heures d'Espagne 2012”

### BARCELONA DESCRIPTION OF THE DESTINATION

Barcelona is progressive, industrious and European ! In the realms of architecture and art, Gaudi and Miró are doubtless Barcelona's most notable Spanish talents, but even non-native artists could not resist its magical attraction: Picasso, Isozaki, Meier, Foster and Oldenburg have all left impressive examples of their work as a legacy.

In the ancient heart of the city there are stunning examples of Gothic art and architecture. As one wanders through the narrow streets it is like returning to a bygone age. The imposing cathedral and the church of Santa Maria del Mar recall the traditional Catholic heritage which persists through to the modern age.

Passing from the Gothic area to the “Eixample” or extension area of the “new” city centre one finds oneself in a completely different world – the world of Modernism. This 19<sup>th</sup> Century movement has become the signature style of the city and, of course, there is no better example of it than the work of Gaudí.

Barcelona has always known how to make the most of great historic events in order to launch itself into the future: the 1888 Universal Exhibition, the 1929 International Exhibition, the 1992 Olympic Games and 2004's International Forum of Culture. This traditional dynamism on the part of Barcelona has pervaded its urban and economic development. No other European city, except for Paris and Berlin, experienced such a large-scale transformation throughout the

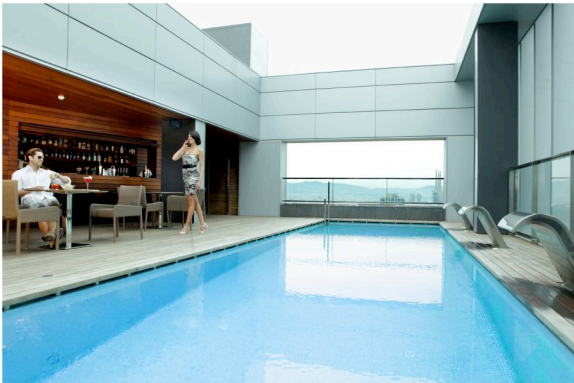

Above all, however, Barcelona boasts a new seafront area, which makes it the only great European metropolis which lives facing the sea. **La Rambla leads** down to the refurbished Port Vell which has become the city's new leisure area through the construction of the IMAX cinema, the shopping and leisure complex Maremagnum and the giant Aquarium. The new restaurants and night-time bars in the Olympic Marina exist side by side with pleasure cruisers and yachts, beaches, parks, offices and patios.

It is the first Ice Bar in Barcelona, a fun and unusual concept that has been well received in other cities around the world. The design is ultra-modern, but the true star of this establishment is the ice -sculpted into tables, sofas and glasses that won't leave anyone cold. Even the bar and walls are frozen. The temperature is kept at a chilly -8° Celsius throughout the year,

creating a stunning contrast to the warm Barcelona climate. In order to deal with the cold, the bar has coats and gloves in stock for unprepared guests.

Inside, guests can drink delicious cocktails presented in glasses made out of ice and wander around, or sit on ice benches, while looking at art created by ice carvers from all over the world. This is a great place for anyone who has longed for a cool refreshing place in which to seek refuge from the summer heat. At IceBarcelona "on the rocks" takes on a whole new meaning.

After your visit to the IceBar, you can warm up and enjoy great cocktails at the beach terrace. With an ocean view and the sun on your face the contrast couldn't be any greater!
